** Post-stratification weights calculated for this survey. Weights were calculated based on the 2020 and 2021 Current Population Surveys. The survey was fielded to adults from an online sample, 2,026 of whom reported that they were registered to vote. Gender, age, race and ethnicity, educational attainment, and census division were used for weighting. Additionally, to correct for non-coverage bias factors associated with online behaviors were used to adjust the sample. Among registered voters, respondents had a mean weight of 1.07, a median weight of 1.16 and a standard deviation of .78.*
